The initial consultation is covered under a valid Alberta Health Care Insurance Plan (AHCIP) card for a patient referred by their physician in Alberta.

## [Testicular Sperm Extraction](#)

TESA / TESE / PESA

Testicular sperm extraction (TESE) is a procedure used to collect sperm directly from the testes after a vasectomy. Testicular sperm aspiration (TESA) and percutaneous epididymal sperm aspiration (PESA) are two methods used to retrieve sperm without surgical incision. The extracted sperm cells are used in fertility treatments.
